

Changing the Conversation About Disability

Watch the video [Changing the Conversation About Disability](#) and then have a class discussion, using the following discussion points as a guide:

- What are the key barriers described in the video?
(Perceptions, attitudes and accessibility)
- Explain this statement “disability only arises when you slot a medical condition a longside a barrier”.
- What is the video suggesting about the role we play in accessibility and inclusion?

Take Away Message

The presence of a disability can create some perceptual, attitudinal, and accessibility barriers. These barriers can be overcome when we consider our own attitudes, perceptions, and what we can do to remove physical barriers in everything we do.
